Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1. Claim 6-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over US Patent No. 6127656 to Kilmer et al, and further in view of US Patent No. 5007899 to Larsson or US Patent No. 5071403 to Larsson.

Kilmer teaches an air pump with a movable diaphragm in a chamber, at least one out port, a threaded shaft operatively connected to the diaphragm, the shaft having an axis, and a motor which oscillates the diaphragm axially the motor being coupled to the diaphragm through threaded engagement with the shaft that translates motor rotation into diaphragm oscillation. (figure 5, Col.6, lines 40-60)

Kilmer however does not teach a breast pump. Larsson teaches a breast pump with an air pump.

Therefore it would have been obvious to one being skilled in the art at the time the invention was made to have added Kilmer's air pump in a breast pump, because as demonstrated by both Larsson's patent's air pumps are well known in breast pump art.

Allowable Subject Matter

2. Claims 10-12 are allowed.

Response to Arguments

Applicant's arguments filed 1/28/2005 have been fully considered but they are not persuasive. In response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, Larsson teaches an air pump already Klimers' air pump is an improvement on the air pump of Larsson where Klimers teaches a better air pump with an improved vacuum chamber.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
